Impact Door

OPTIMA

The Aleco Optima ImpacDor® is an exclusive patent pending one-piece flexible PVC panel door designed for light to medium traffic. The flexible ImpacDor® is ideal for pallet jack, pushcart, pedestrian and light to medium forklift use.

Frame not included but available as an option.

Engineered for a variety of traffic

The Optima ImpacDor® is designed for light to medium commercial, industrial and food processing applications where built-in durability is required. Tough, single-ply, wear resistant PVC panels, available in two thicknesses (1/4" and 5/32"), absorb the initial impact of loads. Patent pending one-piece PVC panels are easy to clean, maintain and can be inexpensively replaced when required/needed. The Optima door should be mounted in the center of the opening on a jamb no wider than 6" for proper operation of the gravity hinge system. For applications outside these parameters please contact your Aleco representative for possible solutions.

Durable, maintenance-free, and easy to install

The Optima ImpacDor® features a corrosion resistant steel hinge and mounting arm. This heavy-duty, top mounted gravity hinge allows for full 180° swing capability while bronze bushings make operation smooth and easy. Solid plate mounting arms offer greater strength and durability than traditional bar designs.

Features:

- One-piece PVC panel construction
- Attractive yet tough textured finish
- Available in two thicknesses: **Standard:** .250 (1/4") and **Economy:** .160 (5/32")
- The 15" x 18" clear PVC window (of the same thickness above) is radio frequency (RF) welded to the primary panels
- Finished panels may be field modified
- Allows full width access, no bottom hinges to restrict traffic flow

NOTE: Fasteners required to attach the product to existing opening. Frame is not included but available.

MOUNTING DETAIL Optima Hardware

Functional designs A totally clear 15" x 18" window is conveniently located 48" from the bottom of the door panel, and is radio frequency (RF) welded in place which creates our innovative Optima design. Bi-parting models overlap in the center up to 2" (1" on 8' wide models).

Available Options:

- Choice of decorative colors: Beige, Brown, Light Grey, Black, Blue, Green, Red and Clear.
- Stainless steel hinge
- Wear panels
- Gasketing

Frame not included

Patent Pending one-piece design
